 Document control – List of recipients and Restrictions277

Introduction:

The Gambling Commission issue codes of practice under section 24 of the Gambling Act 2005, about the manner in which facilities for gambling are provided to ensure that:

- Gambling is conducted in a fair and open way
- Children and other vulnerable people are protected from being harmed or exploited by gambling
- Assistance is made available to people who are, or may be, affected by problems related to gambling.

The Gambling Commission has introduced new provisions in its social responsibility code within the Licence Conditions and Codes of Practice, which require gambling operators to assess the local risks to the licensing objectives posed by the provision of gambling facilities at each of their premises and to have policies, procedures and control measures in place to mitigate the risks. This provision came into force on 6th April 2016.

Operators will need to consider the types of premises and their operation in the local area surrounding the premises in relation to the local profile. The Licensing Authority considered local premises, which should be considered, these include:

- Schools (infant, junior and high schools)
- Colleges
- Youth Centres
- Homeless hostels
- Supported Accommodation
- Addiction treatment centres
- Job Centres
- Drop-in centres
- Religious buildings

Also some things the Operator may need to consider are local demographic data such as:

- Crime and ASB Information
- Index of Multiple deprivation
- Unemployment levels
- Indicators suggesting levels of debt (CCJ's, other measures)
- Socio-demographic characteristics of the area.

The above data is also included in the local profile. The data is correct as of July 2021, unless stated otherwise.

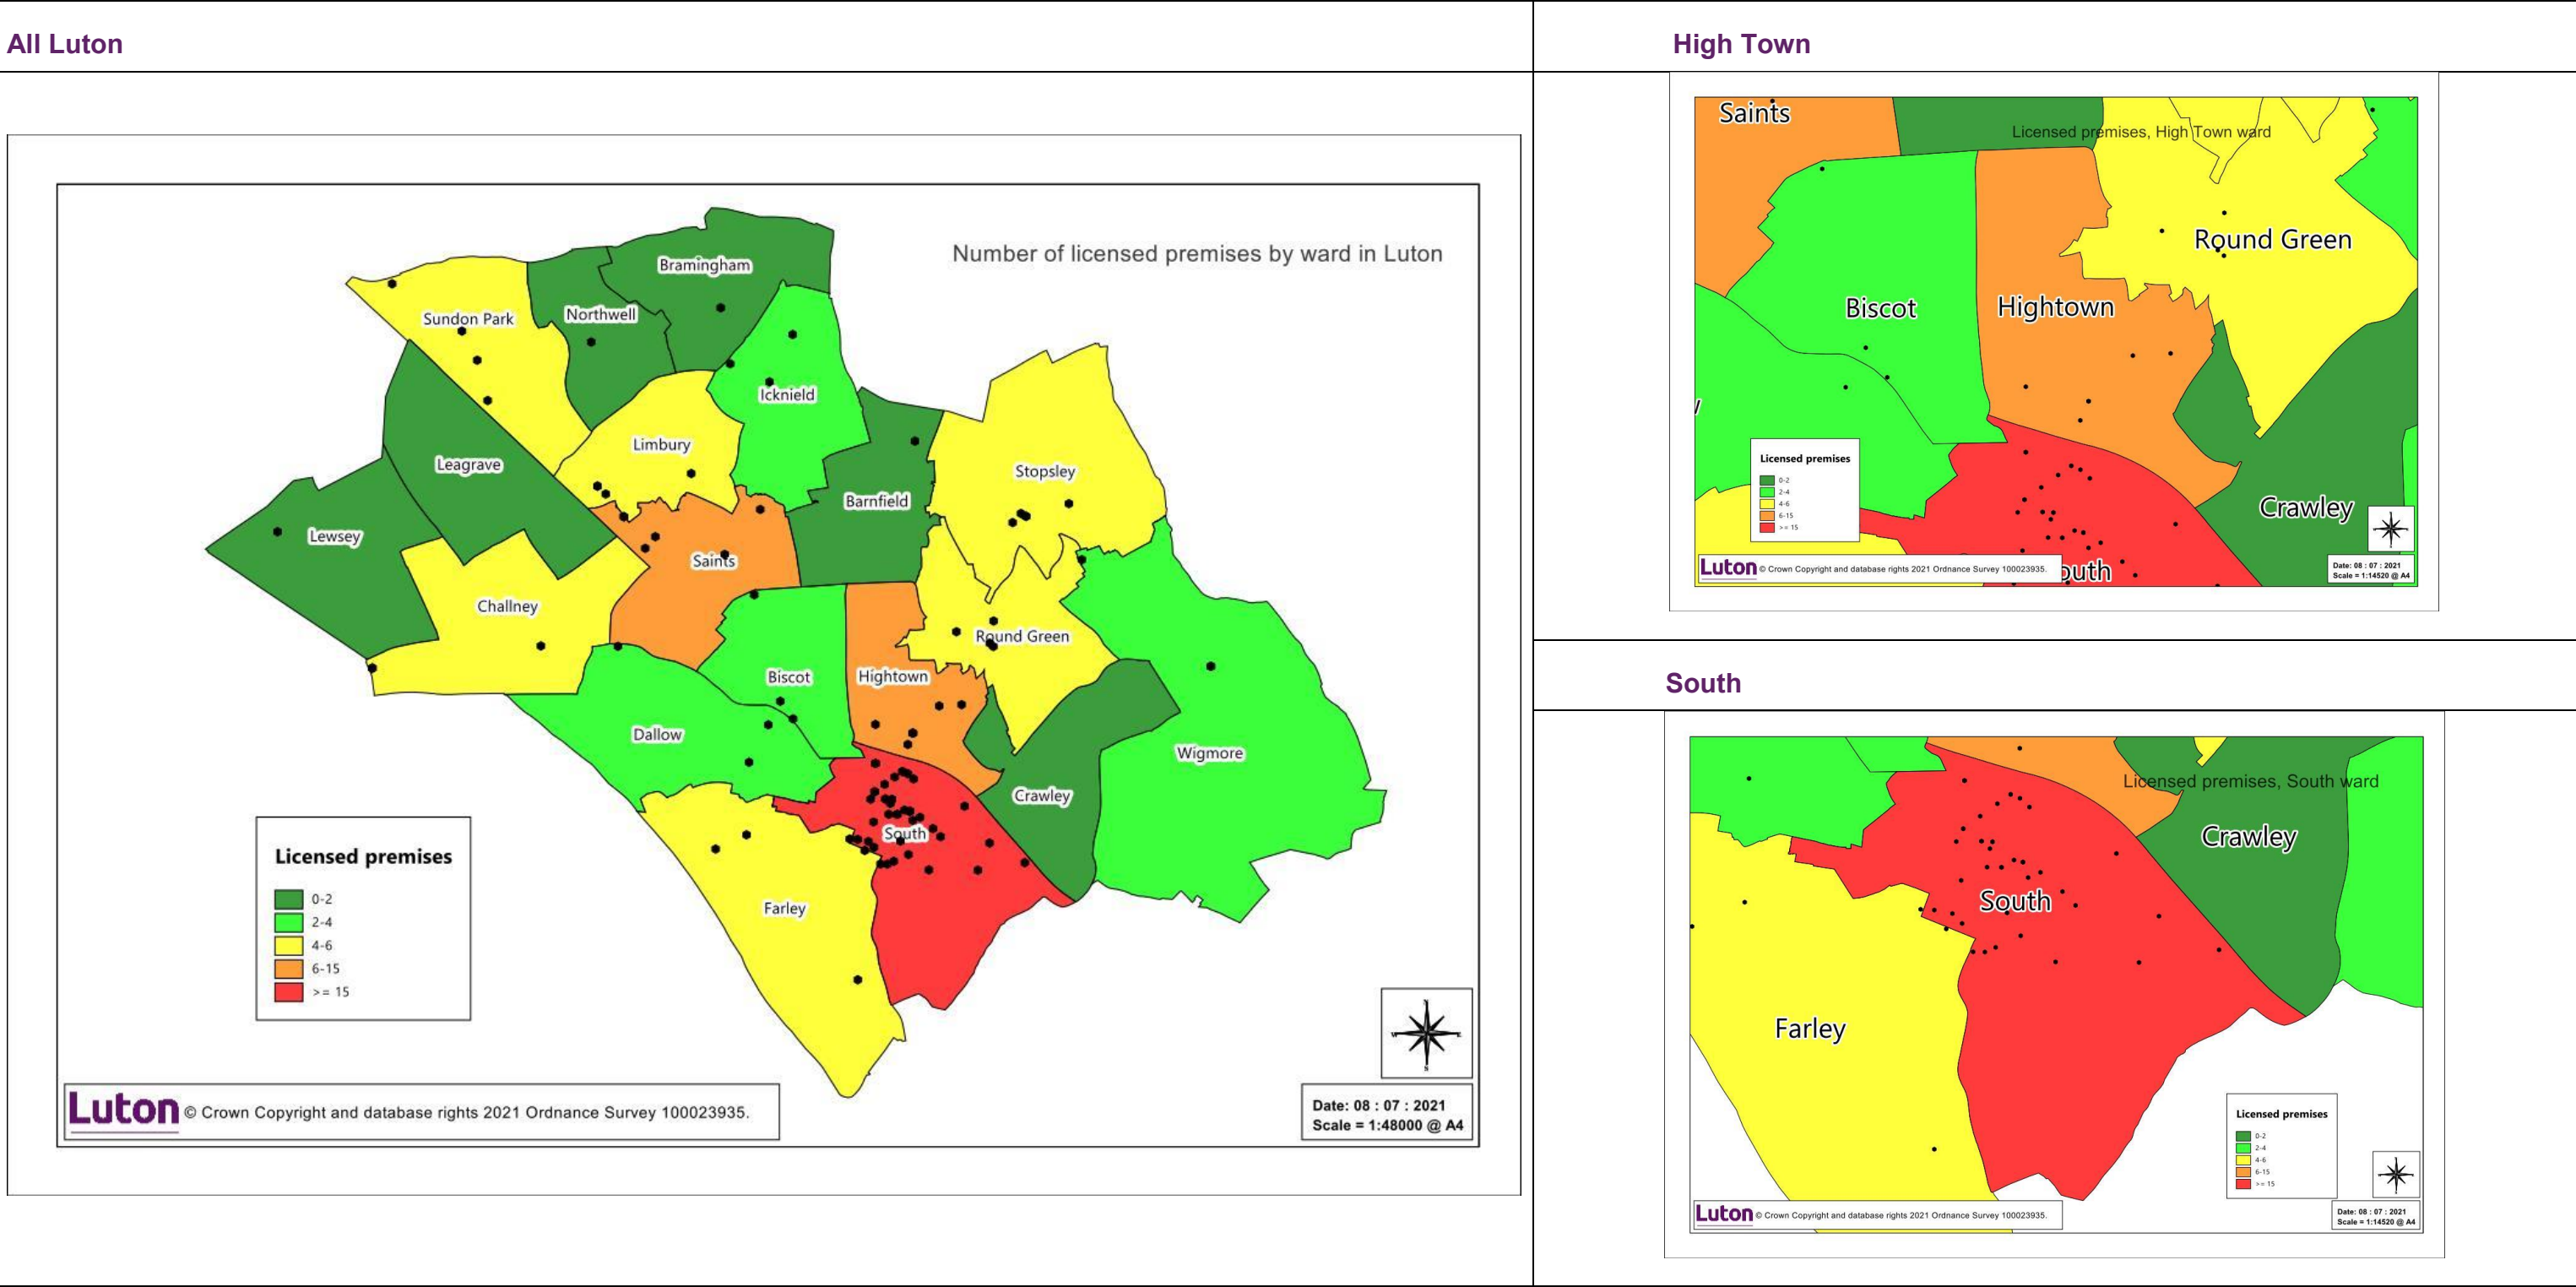

Luton is located approximately 30 miles north of central London. The town has excellent communication links. Central London is 30 minutes away by train (from the town's three railway stations – Luton, Luton Parkway and Legrave). There is also direct rail access to the South of London (Brighton, Gatwick).

The official estimate of the population of Luton is 213,500 for 2020. According to the latest mid-year population estimates (2020 mid-year population estimate, ONS), Luton's population is now 213,500, which increased by 400 between 2019 and 2020. The population increase was driven by a decrease in migration out of Luton to other parts of the UK. The current population increase followed several years of a fall in the population. With an area of 4,336 hectares, this translates into a population density of 49 persons per hectare which is greater than many London Boroughs.

Summary

Socio-demographic characteristics of Luton

All Luton

Experian's Mosaic Public Sector consumer classification provides an accurate understanding of the demographics, lifestyles and behaviours of all citizens and households in the UK. The wealth of data and information on all citizens in the UK in Mosaic Public Sector helps provide you with a comprehensive view of citizens based on a number of factors. These factors are grouped together to identify areas that share common demographic features, which help to identify the generalised behaviour and lifestyle patterns of people at postcode level.

Mosaic Data was used to identify areas that have the potential to be of higher vulnerability to gambling issues (or higher risk areas) by identifying the dominant classification for the postcode, and identifying how many of the following four factors were present within the dominant mosaic type: A below average household income, above average financial stress, more likely to engage in online gambling, and more likely to identify as enjoying taking risks. The total number of factors present within the mosaic type was then identified to assess which areas have a greater number of these factors (and a potential greater risk). The postcode was assessed based on how many of these indicators were present, using a scale of 4 factors = red, to 0 factors = green. Opening a gambling location in areas that have a higher number of these factors may require consideration of additional mitigation of risk.
