

## Specification for street name plates

**Posts** – black circular recycled posts, 80mm diameter, 1220mm length, base of post drilled to accept anchor pins.

**Backboard** – the backboard is made from 3mm dibond composite with black back, sign depth is 150mm for single line name plate and 290mm for double line.

**Channel** – 2x black small channels are riveted to the back of the composite face.

**Sign face** – the sign face is printed black on non-reflective white. A protective clear overlay film is applied.

**Lettering** – the lettering is 90mm kindersley font. Any extra wording e.g. 'leading to' will be 60mm. There is a maximum of 12 letters on one line. Thereafter the name plate will be 2 lines. The 816 dead end symbols will fill depth of nameplate (please see example image below).

**Fixing** – the sign face will be fixed to the recycled legs using 4x 76mm anti rotational clips.

**Foundation** – 1220mm posts require foundations of 450 x 450 x 450mm. These are backfilled and compacted with concrete.
