Claimant count	22
Acorn CACI	23
Crime	24
Appendix A: Luton's claimant count by ward.....	24-25
Appendix B: Luton's crime statistics by ward.....	25-67

Introduction

The Gambling Commission issue codes of practice under section 24 of the Gambling Act 2005, about the manner in which facilities for gambling are provided to ensure that:

- Gambling is conducted in a fair and open way
- Children and other vulnerable people are protected from being harmed or exploited by gambling
- Assistance is made available to people who are, or may be, affected by problems related to gambling.

In response to the Gambling Commission's advice, Luton Council (the licensing authority) has produced this local area profile as a means of assessing risks and concerns pertaining to the establishment of licensed premises. The objective of this profile is to set out what the local area is like, what risks this might pose to the licensing objectives, and what the implications of this are for the licensing authority and operators in order to support the evidence-led production and implementation of policies, procedures and strategies pertaining to licensing

Luton Council considered local premises such as:

- Schools (infant, junior and high schools)
- Colleges
- Youth Centres
- Homeless hostels
- Supported Accommodation
- Addiction treatment centres
- Job Centres
- Drop-in centres
- Religious buildings

Luton Council also considered local demographic data such as:

- Crime and ASB Information
- Index of Multiple deprivation
- Unemployment levels
- Indicators suggesting levels of debt
- Socio-demographic characteristics of the area.

The above data is also included in the local profile. The data is correct as of September 2024, unless stated otherwise.

Luton is located approximately 30 miles north of central London. The town has excellent communication links. Central London is 30 minutes away by train (from the town's three railway stations – Luton, Luton Parkway and Leagrave). There is also direct rail access to the South of London (Brighton, Gatwick).

According to the latest mid-year population estimates (2023 mid-year population estimate, Office for National Statistics), Luton's population is now 231,000, which increased by 3,700 between 2022 and 2023. This was an increase of 2.7%, the population rose by 1% nationally. The population has increased by 6,100 since 2021. Record levels of international migration have been driving this increase. Net international migration into Luton was 7,700 in the last year.

Chart 1: Percentage in need of debt advice in Luton and England 2021-23

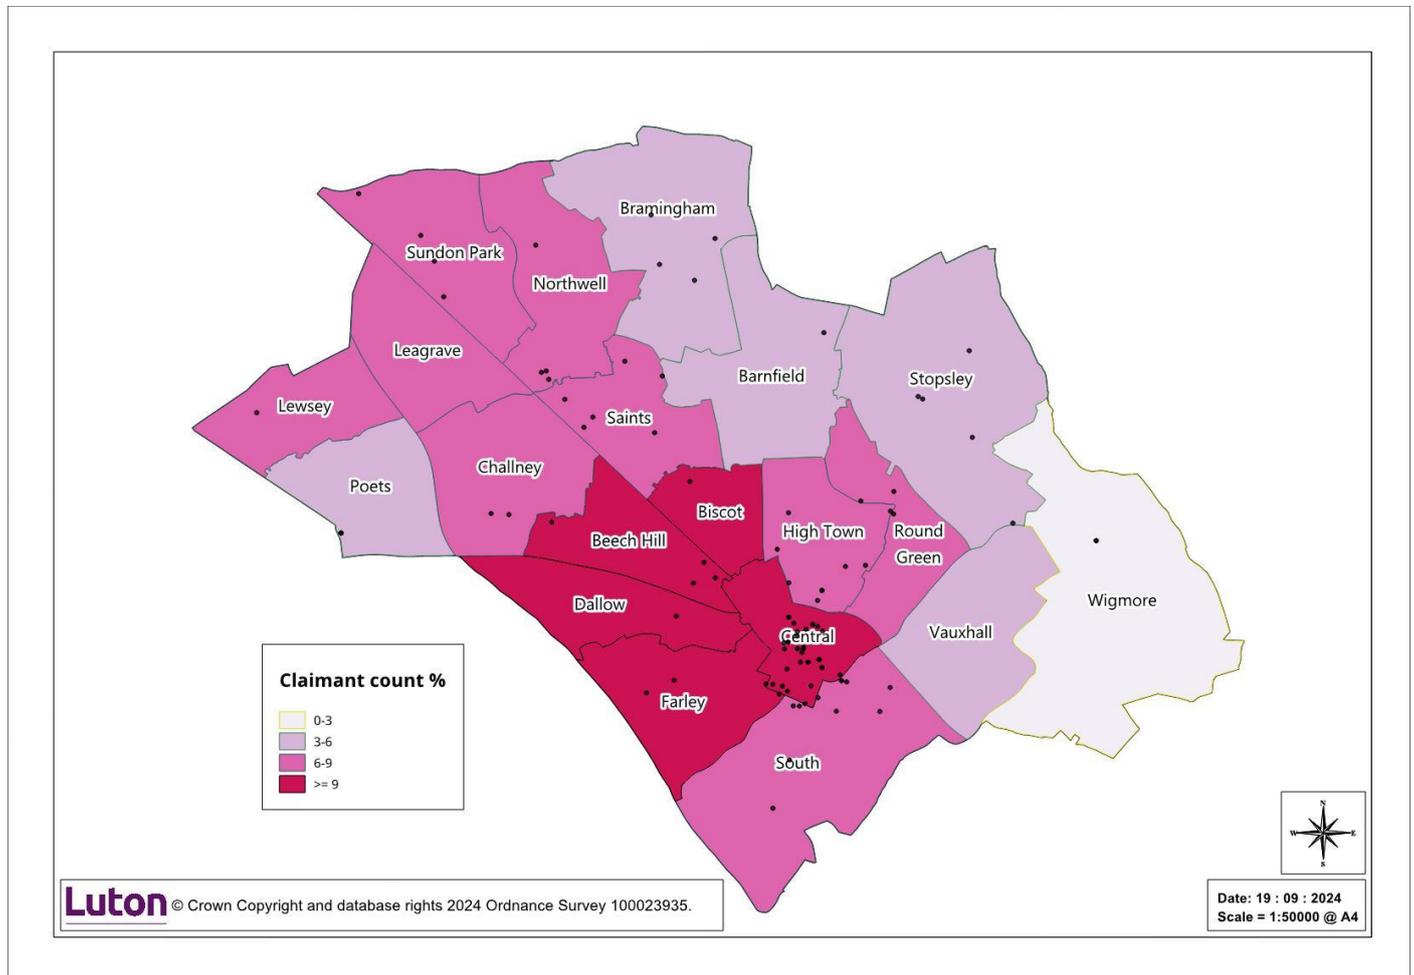

Source: Money & Pensions Service

Chart 1 shows that in Luton 22.1 per cent of the adult population were in need of debt advice in comparison to the 14 per cent average of all English local authorities. Luton is ranked 4th out of 63 unitary and county authorities for the need for debt advice according to data from the Money & Pensions service.

Claimant Count by ward and licensed premises

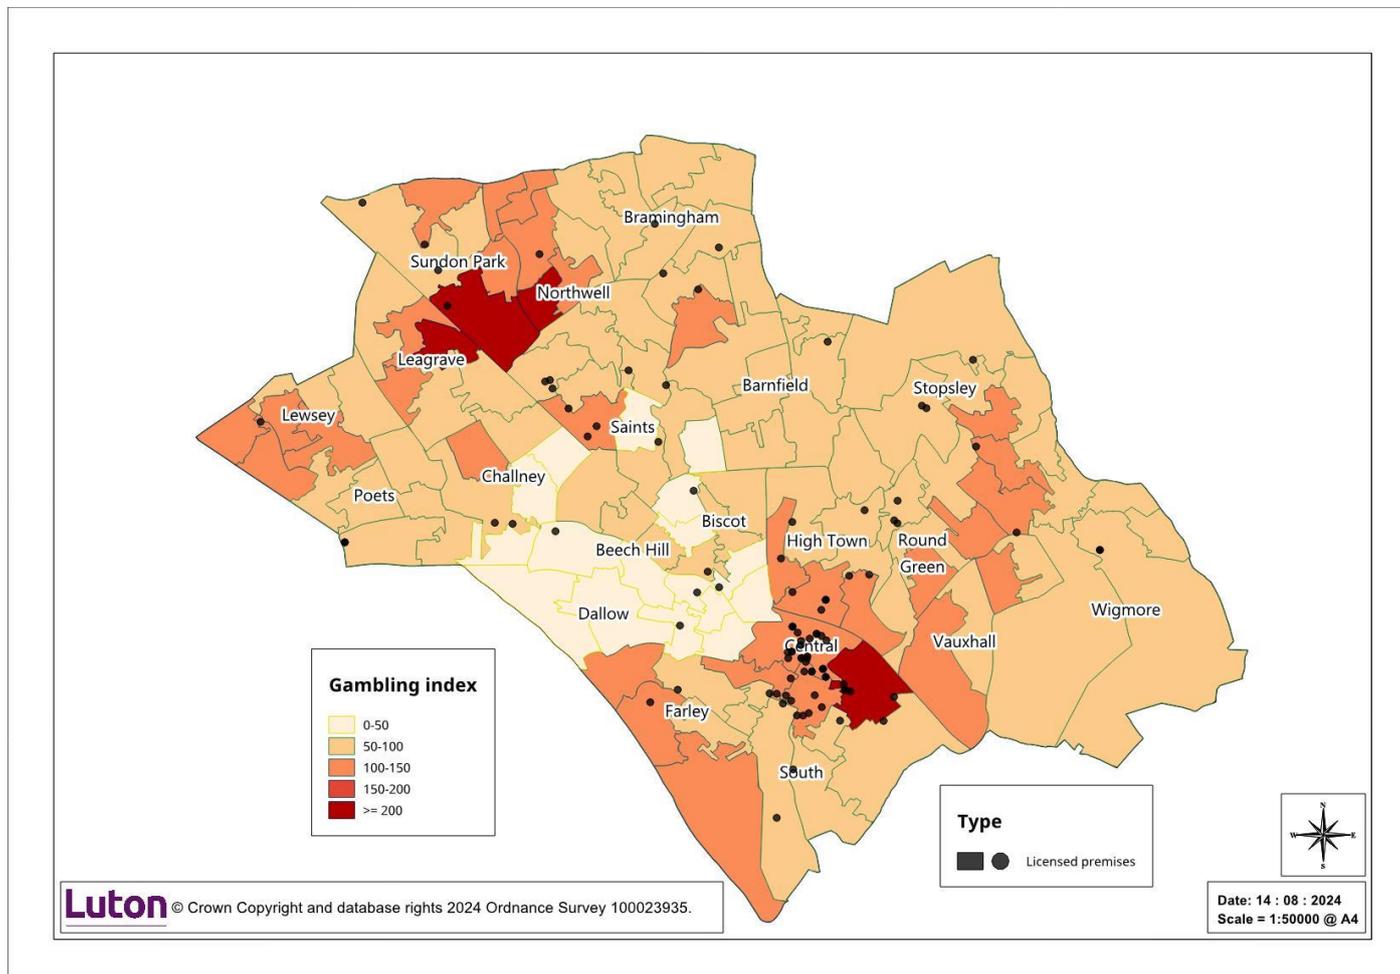

The claimant count records the number of people in Luton of working age who are in receipt of unemployment and income support benefits. These data are published by the Office for National Statistics.

Map 10: Licensed premises and ward percentage claimant count rate, July 2024

Map 11: Licensed premises and CACI Acorn gambling index

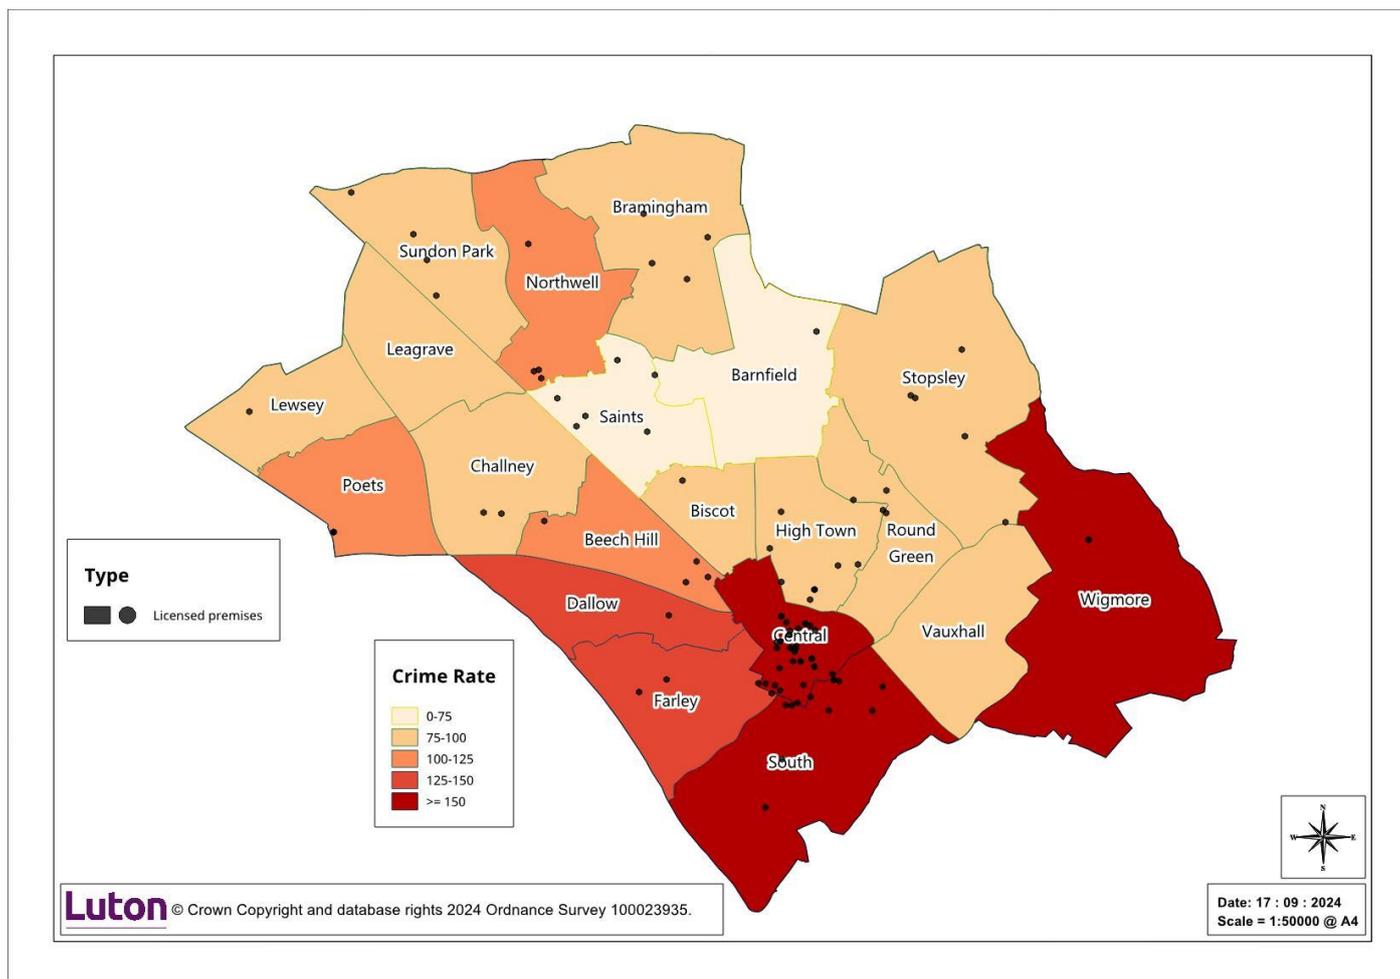

CACI's Acorn consumer classification provides an accurate understanding of the demographics, lifestyles and behaviours of all citizens and households in the UK. The wealth of data and information on all citizens in the UK in Acorn helps provide you with a comprehensive view of citizens based on a number of factors. These factors are grouped together to identify areas that share common demographic features, which help to identify the generalised behaviour and lifestyle patterns of people at postcode level.

Acorn data was used to identify areas that have the potential to be of higher vulnerability to gambling by identifying the dominant classification for the Lower layer super output area (LSOA) in Luton and linking this to Acorn's gambling index in which the higher the index score the higher the likelihood of gambling. The darker areas in the map show areas where the residents are most likely to gamble taken from the Acorn data.

Crime
